

Field Mobility Applications For Oracle PeopleSoft

TYRIAN™ delivers mobile software success and asset optimization for PeopleSoft Maintenance Management customers.

Mobile applications from @hand offer a unique opportunity for Oracle PeopleSoft customers to integrate the extended enterprise. With leading-edge mobile technology, @hand empowers field workers to execute business-critical transactions using a variety of mobile devices, while on-line or off-line.

TYRIAN™ is @hand's powerful and configurable mobile product for PeopleSoft maintenance management environments. **TYRIAN™** combines @hand's rich history and expertise in the EAM mobility market with new mobile solution capabilities to extend the reach of your PeopleSoft system.

Increase the value of your PeopleSoft Investment

@hand **TYRIAN™** enhances the quality and speed of information in PeopleSoft. Mobile workers can efficiently access and navigate enterprise data, using applications tailored to specific organizational requirements. Mobile data transfers seamlessly to PeopleSoft and other systems of record, where updates are available on a near real-time basis.

Your Enterprise is @hand

@hand combines thought leadership in asset optimization with a broad perspective on mobility. Customers leverage @hand software in support of focused solutions, as well as wide-ranging initiatives. Far exceeding the capabilities of point solutions, @hand's versatile mobile architecture enables quick application delivery and provides a robust framework for managing and evolving solutions over time.
